

For the first time Caldea brings you Mondaigua, a multimedia show created by Comediants

Mondaigua is a show that celebrates the union between fire and water, two elements which make Caldea a thermoludic centre designed to improve personal wellbeing.

Through different imagery, Mondaigua describes the journey of water from the universe to the interior of the earth, where it is converted into hot water, the source of life and pleasure.

The well-known collective of artists of Comediants has created, upon Caldea's request, a show which uses dramatic techniques that habitually develop those incorporated into Caldea's own resources, such as the water games and curtains, or the different styles of springs and fountains.

A soundtrack with songs especially composed for the show is the conductive thread around which Mondaigua revolves.

From the inside lacuna and the adjacent zones the audience witnesses a pyrotechnic "big bang", in which the planets appear, converted into squares inspired by images from Greek mythology: they contemplate the rising of the sun, travel to galaxies, find themselves in the Earth's rainy atmosphere, run through the heart of our planet and arrive at the sea, the cradle of life.

Mondaigua has also collaborated with the prestigious corporation Pirotecnia Igual, who use products especially designed for this spectacle with the aim of avoiding any form of harm to people and installations.

Comediants has thought up and designed much more than a traditional sound and light show: automatisms, magical elements, pyrotechnics, projections, light play, special smoke effects, soap bubbles...

A creation which will surprise any visitor to Caldea with its originality, while they enjoy the installations of the Thermoludic Centre to recuperate form and vitality through use of the properties and benefits of thermal water.
